Local Dealer:

The **FD 95 Rotary Perforator/Creaser** is specially designed to finish printed sheets, up to 13.8" x 19". Its **three-tire friction feeding system** reliably feeds up to **7,080 sheets per hour**, and can create **up to 5 parallel perforations and/or creases in a single pass**. With **variable speed control** for different paper weights up to 180gsm, the FD 95 perforates and/or creases automatically, stacking the finished sheets neatly on the **telescoping outfeed table**. Standard set-up includes **two perforating wheels, one creasing wheel and paper guides**. Options include additional perforating sets, microperforating sets (17 tpi), creasing sets and guide strips to accommodate 55 - 60gsm paper. It's ideal for small print shops, on-demand, and in-plant finishing applications including postcards, invitations, tear-offs, brochures, billing statements, and more.

**Automatic Feeding**  
Telescoping infeed tray with adjustable side guides and three-tire feed system

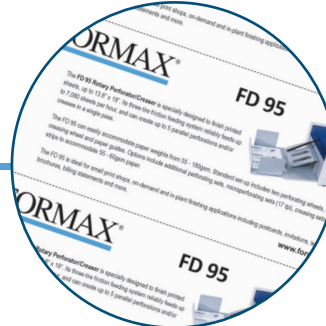

**Telescoping Outfeed**  
Outfeed extends to accommodate sheets up to 13.8" x 19"

**Variable Speed Control**  
Adjustable to process a variety of different paper weights

**Resettable LED Counter**  
Three-digit counter keeps an accurate tally of processed sheets

**Single-Pass Processing**  
Perforates and creases in a single pass up to 5 per sheet

## STANDARD FEATURES
